**Two-Bit S-Band Antenna
(Model: INST-16)**

The Micro I-Fuze S-Band antenna features small size, light weight, and excellent thermal design for today's critical airborne and telemetry applications. This reliable antenna provides MIL-Spec quality and environmental capability, as well as being able to measure down range tracking. Weight is only 2 grams. Applications include smart munitions, unmanned aerial vehicles, and missiles.

Specifications

Diameter:	0.873" dia x 0.10" thick
Antenna:	Nose mountable antenna allows in-bore measurement of gun-launch event, as well as down range tracking.
Center Frequency:	2255.5 MHz
Impedance:	50 ohms
